

# RAILWAY ROLLING STOCK CONGRESS 2026

INVITATION TO COOPERATE ON THE CONFERENCE

October 26, 2026r.  
Hotel Arche Pulawska Residence,  
Warsaw, Poland

# Railway Rolling Stock Congress 2026 – leading event for the rolling stock sector in Poland.

We invite you to take part in the **Railway Rolling Stock Congress**, a conference dedicated to the practical aspects of purchasing, financing, managing, maintaining, and developing railway rolling stock. The Congress will examine the needs and investment plans of leading passenger and freight operators, the possibilities of financing investments through public and private sources, the modernization of existing rolling stock, the transformation, automation and digitalization of railway vehicles, new technologies, maintenance requirements for rail vehicles and rolling stock, certification processes, as well as regulatory and legal requirements related to maintenance and transport safety.

The event will have a strictly practical and hands-on character. It will bring together representatives of leading passenger and freight operators, manufacturers of rail vehicles and rolling stock, companies providing maintenance and servicing of rail vehicles and rolling stock, suppliers of innovative technological and technical solutions, and entities supporting operators and transport services.

## Main topics of this year's Congress:

- Development of railway rolling stock as an element of transport policy in Poland,
- Financing rolling stock procurement: FEniKS, Recovery Plan, Regional Programs, state budget, private debt financing
- Development and investment plans of leading railway operators in Poland and their implementation
- Challenges in modernizing and maintaining existing rolling stock
- Modern technologies for the operation, maintenance, and cleaning of rolling stock
- Innovative solutions for rolling stock location, technical condition monitoring, and fault prediction
- Rolling stock transformation: FRMCS, digitalization, automation, autonomy, IoT
- Digital communication for rail vehicles: FRMCS, 5G architecture, integration of onboard systems
- Cybersecurity of rail vehicles
- Evolution of freight rolling stock: DAC, Smart Wagons, innovations, safety
- Technical and functional safety of railway rolling stock
- Key systems for rolling stock (power systems, communications, onboard telematics)
- Legal requirements: CENELEC, SIL, MMS, SMS in practical rolling stock management
- Financial guarantees and insurance for rolling stock investments, and insurance for rolling stock operation and maintenance.

## Railway Rolling Stock Congress 2026 – Who Will Participate?

### The Congress will be attended by representatives of:

- Government administration and regional (voivodeship) authorities
- PKP Group as well as PKP Intercity
- Leading national, regional, and local railway operators
- Leading manufacturers and suppliers of rail vehicles and rolling stock
- Leading providers of maintenance and servicing services for railway rolling stock
- Suppliers of solutions and technologies for rail vehicles and rolling stock
- Manufacturers and suppliers of key systems for railway rolling stock
- Providers of solutions and services for the modernization and maintenance of rolling stock
- Insurance companies, law firms, and research institutes.

The background of the page is a collage of railway-related images. On the left, there's a tall blue skyscraper next to railway tracks with a train. On the right, there's a view from inside a train's driver's cabin, showing multiple digital displays and a view of the tracks ahead. At the bottom right, there's a close-up of a train's front end.

# Railway Telecommunications Congress 2025

## – Why Is It Worth Attending?

The **Railway Rolling Stock Congress** will be a practical and content-driven event dedicated to all individuals and companies operating in the passenger and freight rolling stock market. We will discuss the development and investment plans of leading passenger and freight operators, the possibilities and models for financing rolling stock investments, the challenges of maintaining and servicing railway rolling stock, as well as the technical capabilities for its modernization. Our discussions will cover not only the current state of the rolling stock market, but also its future. The sector is entering a major transformation driven by the implementation of FRMCS, the autonomy and digitalization of rolling stock control, innovative solutions for technical condition monitoring and vehicle maintenance (predictive maintenance, condition monitoring, digital twins), and new technologies for freight rolling stock (DAC, smart wagons, telemetry). We will explore these innovations and discuss the perspectives and benefits of their deployment – and consider how they will reshape the railway transport market.

Certification, interoperability, and safety remain key issues for the rolling stock sector. Therefore, we will dedicate a separate thematic block to these topics, discussing the certification and homologation of rail vehicles, the technical and functional safety of rolling stock, key standards and systems (CENELEC, SIL, MMS, SMS), as well as the obligations of users and keepers of rail vehicles.

The Congress is designed to be a place of inspiration, knowledge exchange, presentation of achievements, and the development of business and social connections.

# Railway Rolling Stock Congress 2026

## – Who Is Organizing the Event?

The Congress is organized by Adventure Consulting. We are the organizer of the most important conferences for the railway sector in Poland:

- **Railway Law Conference** (January)
- **Railway Telecommunications Congress** (February)
- **Railway Safety&Security Congress** (May)
- **Railway Investment Congress** (September)
- **Railway Rolling Stock Congress** (October).

We have organized more than 150 international and national industry conferences and congresses across sectors such as railway, logistics, postal and parcel markets, energy, gas, fuels, and telecommunications – attracting more than 7,000 participants.

## We invite you to collaborate:

If you are interested in partnership opportunities, product presentations, delivering a speech, setting up an exhibition stand, or participating individually, we warmly invite you to get in touch.
